

**FOR IMMEDIATE RELEASE:**

## **Professor Presents Unique Theory of Evolution in New Book**

***Frozen Evolution* by Professor Jaroslav Flegr argues that evolution occurs after species have short periods of change followed by stasis**

PRAGUE, Czech Republic – In *Frozen Evolution: Or, That's Not the Way it is, Mr. Darwin – A Farewell to Selfish Gene*, author and Professor Jaroslav Flegr turns evolutionary theory on its head. Flegr presents genetic, paleontological and zoogeographical evidence to demonstrate that evolution of sexual species stops when a sufficient amount of genetically determined variability accumulates in the gene pool.

In the book, the author rejects Darwin's theory of evolution or the theory of the "selfish gene," arguing that neither can explain evolution of sexual organisms. Flegr suggests adaptive properties of organisms are formed during a short period of evolutionary plasticity in which the species can change its properties in response to selection pressures in the environment.

Intelligently written, *Frozen Evolution* is also reader friendly for both scientists and laypeople alike. Flegr introduces and explains more than 98 different scientific terms such as adaptive traits, Lamarkian model of evolution and more, so that even general audiences can appreciate his arguments. Whether readers are students or scientists, Flegr expects his new book to have a profound impact on the way people think about evolution.

For more information or to request a free review copy, members of the press can contact the author at [flegr@cesnet.cz](mailto:flegr@cesnet.cz). *Frozen Evolution: Or, That's Not the Way it is, Mr. Darwin – A Farewell to Selfish Gene* is available for sale online at Amazon.com, BookSurge.com, and through additional wholesale and retail channels worldwide.

### ***About the Author***

Professor Jaroslav Flegr is a graduate of the Faculty of Science of Charles University in Prague. He has devoted most of his career to molecular phylogenetics and evolutionary parasitology. The author of a textbook on evolutionary biology and numerous research papers, he currently lives in Prague, Czech Republic.

### ***About BookSurge***

BookSurge Publishing is a DBA of On-Demand Publishing LLC, a subsidiary of Amazon.com Inc., (NASDAQ AMZN). BookSurge is a pioneer in self-publishing and print-on-demand services. Offering unique publishing opportunities and access for authors, BookSurge boasts an unprecedented number of authors whose work has resulted in book deals with traditional publishers as well as successful *authorpreneurs* who enhance or build a business from their professional expertise.
