

LAND AIR WATER AOTEAROA

Connecting you with New Zealand's rivers

LAWA's vision

Improve public's awareness of freshwater quality issues

Credible and informative website providing robust environmental information

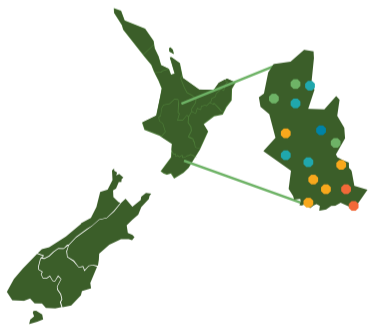

The hub for freshwater information

User friendly interface

LAWA demonstrates the power of working collaboratively

3000 water quality and quantity sites are monitored around New Zealand

Data is collected and analysed by New Zealand's 16 regional councils and the Ministry for the Environment

The Cawthron Institute independently reviews the data

Data and supporting science is communicated through design

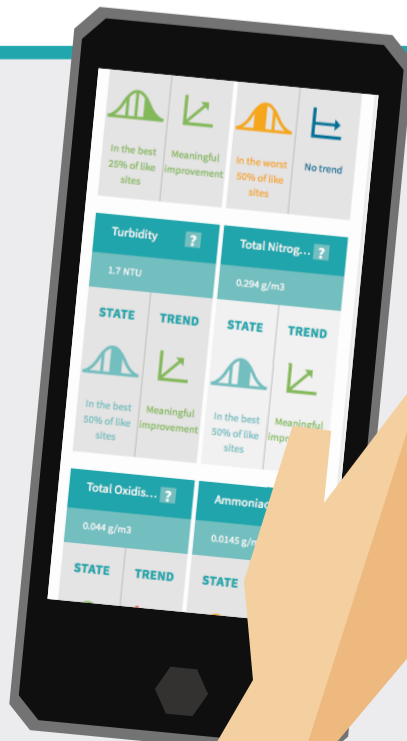

Meaning you can access the information anytime, anywhere

LAWA is a collaboration between Local Government's 16 regional and unitary councils, the Ministry for the Environment (MfE), and the Cawthron Institute.

It provides a wide range of information that will help New Zealanders make good choices about using and enjoying our highly valued resource – water.
